

Accessories

Add more fun to the Cadron Creek Playground pumps with our stainless steel **Spout & Shout** quick connect attachment. This device sprays water from the spout as the children pump!

Customizable!

As the manufacturer of these pump systems, we can make modifications to the pumps that your unique landscape may require. Just let us know if your application has special requirements. We'll be happy to work with you to create the perfect pump system for your playground. Our **Pump-n-Play Elephant Snout** is the result of a customer's request for a longer spout.

About Us

Cadron Creek Play is a division of Bison Pumps, a family-owned business based in Conway, Arkansas. Cadron Creek Play specializes in Water Pumps for Playscapes.

Our pumps are often incorporated into parks, nature trails, botanical gardens, playgrounds, outdoor classrooms or children's museums. The pumps can be paired with a variety of water play accessories like troughs, water tables and more.

Dog Park Water Pump System

And we haven't forgotten about our 4-legged friends! Our **Dog Park Water Pump System** is a great amenity to parks, picnic areas and hiking trails.

PLAYGROUND PUMP SYSTEMS

The Power of Play

Cadron Creek Play's Playground Pump Systems are an exciting water play feature for your park or playground.

All our hand pump systems simulate the action of a traditional water hand pump. However, no well is needed as they are connected to a pressurized water line (such as city water). As the water in the tank is pumped down to a specified level, the water will be turned on automatically to refill the tank.

Our **Lil Guppy Playground Pump** comes with a standard 12" long spout with a quick connect attachment to utilize with our accessories, 24" handle, a 3" body and a 7" flange. Made of stainless steel, the pumps are manufactured and hand polished at our facility in Conway, Arkansas. We offer a 5-year warranty on all manufactured parts!

Lil Guppy Playground Pump

Engaging Fun!

Cadron Creek Play offers multiple ways for the children to enjoy the water.

Our **Pump-N-Play** playground pump system combines our Lil Guppy stainless steel hand pump with a 30" tall stainless steel tank for a total height of 54 inches. With these two units combined, older children (ages 5-12) will thoroughly enjoy the water play.

Pump-N-Play

Pump-N-Play Junior

For the smaller children (ages 3-5), we offer the **Pump-N-Play Junior** playground pump system. This stainless steel pump and tank combination is only 39" tall which is just right for smaller children.

Visit us online for more options.

Water Play!

Some landscapes call for separating the Cadron Creek Play pump from the tank. In these cases, we offer the **Lil Guppy Playground Pump System**, which includes an 8-gallon plastic tank plus reinforced hose to connect the two. With this setup, the pump can be mounted on a log, rock or other structure and the tank placed in a safe location away from the play area and out of the sun.

Lil Guppy Playground Pump System

And some playgrounds/landscapes require an all-in-one system. Our **Waterfall Table & Basin Playground Pump System** includes a Lil Guppy Playground pump with a cascading table flowing into a basin.
