Lil Ducky Pitcher Pump

Designed For The Agritainment Industry

- Stainless steel pump uses modern pump technology
- Brass bushing and stainless steel shoulder bolt combination for the pump handle/linkage connection
- Support anchor to hold a curved duck trough
- Includes drop pipe to attach directly to the foot valve of the pump and draw water from a tank below

Built with durability
and easy to setup for
the duck racing community

The Cadron Creek Play Lil Ducky Pitcher Pump is designed just for the Agritainment industry. This stainless steel shallow well pump was made with Duck Races as the sole focus. The handle length and grip are positioned to allow children to easily grasp it and "Pump like crazy!" That is what kids do with these pumps. They're in a race after all!

For the proprietors, we focused on durability. The pump handle/linkage connection is made of a brass bushing combined with a precision turned stainless steel shoulder bolt connecting the handle to the pump body. This combination is designed for a long life of pumping. A Lil Ducky Pitcher Pump will get a lot of attention and incur many strokes per day.

To assist with incorporating the Lil Ducky into the Duck Race structure, we have included a support device designed to hold a curved duck trough (such as a section of PVC Pipe cut in half). We also include a Lil Ducky Drop Pipe that is designed to attach directly to the foot valve of the pump and draw water from a tank below. These design features further support the focus on the Duck Racing community.

By using our existing modern pump technology and focusing on maintenance reduction, the Lil Ducky Pitcher Pump is a great option for all Agritainment operators. Instead of maintaining or replacing the old cast iron pumps, you can feel confident in the materials and engineering in the Lil Ducky to allow you to do your job while the kids do theirs... **Race!!!**

CADRON CREEK PLAY

Lil Ducky Pitcher Pump

Cadron Creek Play Duck Racing Pumps are the highest quality playground pumps on the market. Made of Stainless Steel, the pump is hand-polished and manufactured 100% in the USA. With sturdy welds and a three-year warranty, it has minimal maintenance requirements.

At Cadron Creek Play, it is our mission to get kids off the screens and into the outdoors. Children are naturally drawn to water. Whether they are playing in a bathroom sink or suddenly sprint to the nearest water fountain, kids seek out water! The Lil Ducky Pitcher Pump further encourages that curiosity as it enhances skills like speed, endurance, understanding buoyancy, and feeling the weight of water and the amount of force required to lift it. The Lil Ducky Pitcher Pump gives children a hands-on learning opportunity to put their knowledge to work ... and compete in a race!

HIGHLIGHTS

- 304 Stainless steel construction of pump head, lift rod, handle and hardware
- Welded components
- Handle link bushing – lead-free brass
- Foot valve – food-grade plastic, stainless steel and Buna rubber
- Piston – NSF approved Acetal
- No priming needed
- 3-year warranty on all manufactured parts

CONTENTS

- (1) 304 Stainless Steel Pitcher Pump
- (1) 1 1/4" NPT Schedule 120 PVC threaded and pre-cut pipe
- (1) Plastic 1 1/4" Coupling
- (1) 100 Mesh Plastic Screen with 1 1/4" NPT male connection
- (1) Installation Manual
