# Dog Park Water Pump System

*Cadron Creek Play's Dog Park Water Pump System is a fun way to provide fresh, cool water for your four legged friend while at the park.*

Don't give Doggo warm, stale water from your water bottle. The owner hand-pumps fresh, clean water into a connected basin that slowly drains. Just a couple of strokes on the pump fills the basin. The slow drain gives your pup a chance to lap it up while ensuring there's always fresh water in the basin. The hand-pumping action promotes water conservation. The pump connects to a pressurized water line.

The Dog Park Water Pump System is made of the highest quality materials. Made of Stainless Steel, it is built for harsh climates. With sturdy welds and a five-year warranty, it has minimal maintenance requirements. The Dog Park Water Pump System is hand-polished and manufactured 100% in the USA.

# Dog Park Water Pump System

## HOW IT WORKS

Water from a pressurized water line (i.e. city water) fills the underground tank and automatically shuts off at the fill line. The water line is connected to the Pump System with a  $\frac{3}{4}$ " NPT connection. Dog-lovers then hand-pump the water into the slow-drain basin. The water refills as it's pumped out.

## INSTALLATION

The Dog Park Water Pump System requires a flat surface to serve as the foundation on which it will be mounted. This most often means a concrete slab. The water line must be installed to the center of the foundation prior to installation. Anchor bolts formed into the slab typically hold the tank in place using the holes provided in the tank flange.

## MAINTENANCE

There are wear parts in the top of the pump where the lift rod moves into the pump. In addition, the piston assembly includes items that wear with usage. These items are sold separately as a Maintenance Kit. We suggest performing maintenance once a year along with winterization.

## WINTERIZATION

The Dog Park Water Pump System can freeze. This will most likely cause damage to the pump. Therefore, it is very important to drain all water from the pump system at the end of the season.

## PUMP

- 36 inches tall to the top of the handle
- Connects to  $\frac{3}{4}$ " pressurized water line
- Made of stainless steel: body, handle, rod, hardware
- Designed for heavy-duty four legged traffic
- 5-year warranty on all manufactured parts
